Professional Summary

Software Development Engineer experienced in building reliable, scalable, and maintainable enterprise applications and backend services. Skilled in Java, Python, and SQL, with a strong foundation in distributed systems, RESTful APIs, and high-volume data pipelines. Comfortable working across multi-functional teams to understand requirements, define solutions, and deliver software for rapidly evolving products at scale. Committed to clean, testable code, unit testing, debugging, and code reviews within Agile workflows.

Technical Skills

Languages: Java, Python, C++, SQL, JavaScript, TypeScript
Backend & APIs: Spring Boot, FastAPI, Django, Node.js, Express.js, REST APIs, GraphQL, Microservices, Clean Architecture
Frontend: React.js, Next.js
Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Elasticsearch
Distributed Systems: Kafka, RabbitMQ, Asynchronous & Batch Processing, Caching, Load Balancing
Cloud & DevOps: AWS (EC2, RDS), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux
Testing & Practices: Unit Testing, Pytest, Debugging, Code Reviews, Agile/Scrum, Postman, Selenium, Performance Optimization

Experience

- NxtWave** **08/2025 – Present**
Hyderabad
Software Development Engineer
– Built and maintained reliable, scalable, and maintainable backend applications and RESTful APIs in Python using Clean Architecture principles, ensuring high availability and strict code testability.
– Implemented high-volume asynchronous batch processing pipelines, optimizing large-scale data ingestion and improving application throughput by 45%.
– Partnered with cross-functional teammates and project managers to define solutions and estimate scope, and contributed to code reviews and unit testing within Agile workflows.
- ZIGRAM** **01/2025 – 07/2025**
Gurugram
Software Development Engineer
– Developed and hardened core backend APIs for a high-stakes AML/Sanctions SaaS platform, ensuring high data fidelity and secure data mapping for enterprise compliance teams.
– Orchestrated automated CI/CD pipelines using Jenkins and GitHub Actions, cutting release times by 40% while maintaining a 95%+ deployment success rate.
- AmberFlux EdgeAI Pvt Ltd** **07/2024 – 12/2024**
Remote
Full Stack Developer Intern
– Designed and integrated full-stack features for scalable EdgeAI applications, optimizing data flow between frontend interfaces and backend services.
– Implemented an Elasticsearch-driven search mechanism, tuning complex queries and benchmarking latency to accelerate retrieval speeds by 40%.

Projects

- Refer-Loop** | *FastAPI, SQLite, Razorpay* *GitHub*
– Engineered a scalable, secure authentication and referral system using FastAPI and a RESTful architecture.
– Designed encrypted end-to-end payment flows with the Razorpay API, implementing robust error handling to reduce transaction failures by 25% across 500+ successful transactions.
- CipherChat Messenger** | *React, Node.js, RabbitMQ, Socket.io* *GitHub*
– Built a real-time, full-stack messaging architecture supporting 10,000+ concurrent users via optimized asynchronous programming and socket-layer management.
– Implemented end-to-end message encryption and hardened session flows to improve user privacy and reduce security vulnerabilities.

Honors & Achievements

- **Winner, NSUT Innohacks & MNIT Sphinx:** Secured 1st position in national-level hackathons building FinTech and AI-powered solutions.
- **Global Rank 245, Google Kickstart Round D:** Top rank among 10,000+ participants globally.

Education

Ajay Kumar Garg Engineering College, AKTU	2021 – 2025
<i>Bachelor of Technology (CSE-AIML), Grade: 8.5 GPA</i>	<i>Ghaziabad, Uttar Pradesh</i>
Oxford Model Senior Secondary School	2019 – 2020
<i>Central Board of Secondary Education Class 12th, Grade: 93.8%</i>	<i>Kanpur, Uttar Pradesh</i>
Children's Academy	2017 – 2018
<i>Central Board of Secondary Education Class 10th, Grade: 93.2%</i>	<i>Lakhimpur-Kheri, Uttar Pradesh</i>
